

Single element (React Component)

Single React Component

- 1) Sidebar
 - Single reusable component
 - Has same behavior
 - Has same styling
 - Can have different content
 - Can be shown from different sides

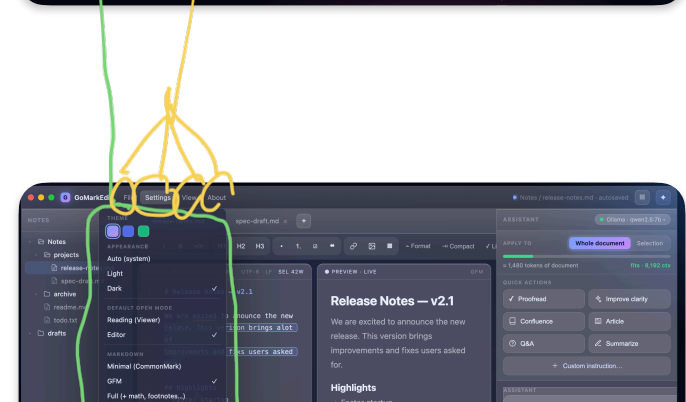

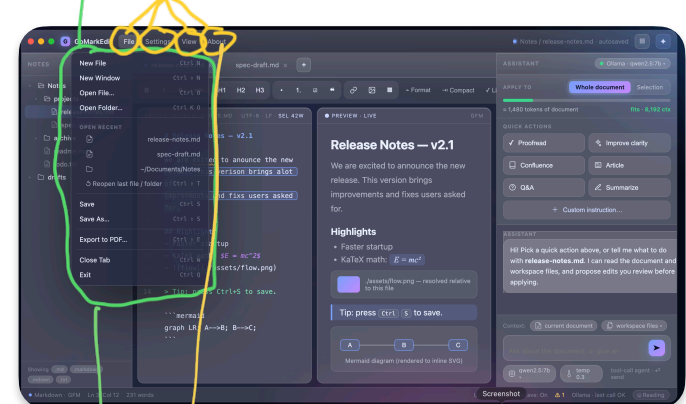

- 2) Editor bar and elements
 - Scrollable horizontally widget
 - Has items as grouped "Islands"
 - Each island can have 1+ elements
 - Single style
 - Single logic

- 3) Menu Bar
 - Similar approach to Editor bar
 - Single style
 - Single logic
 - Reusable components

- 4) Menu popups
 - Single style
 - Single logic

Single React component

Single React component

Logic of Reusing components :

For Example:

1) Sidebar

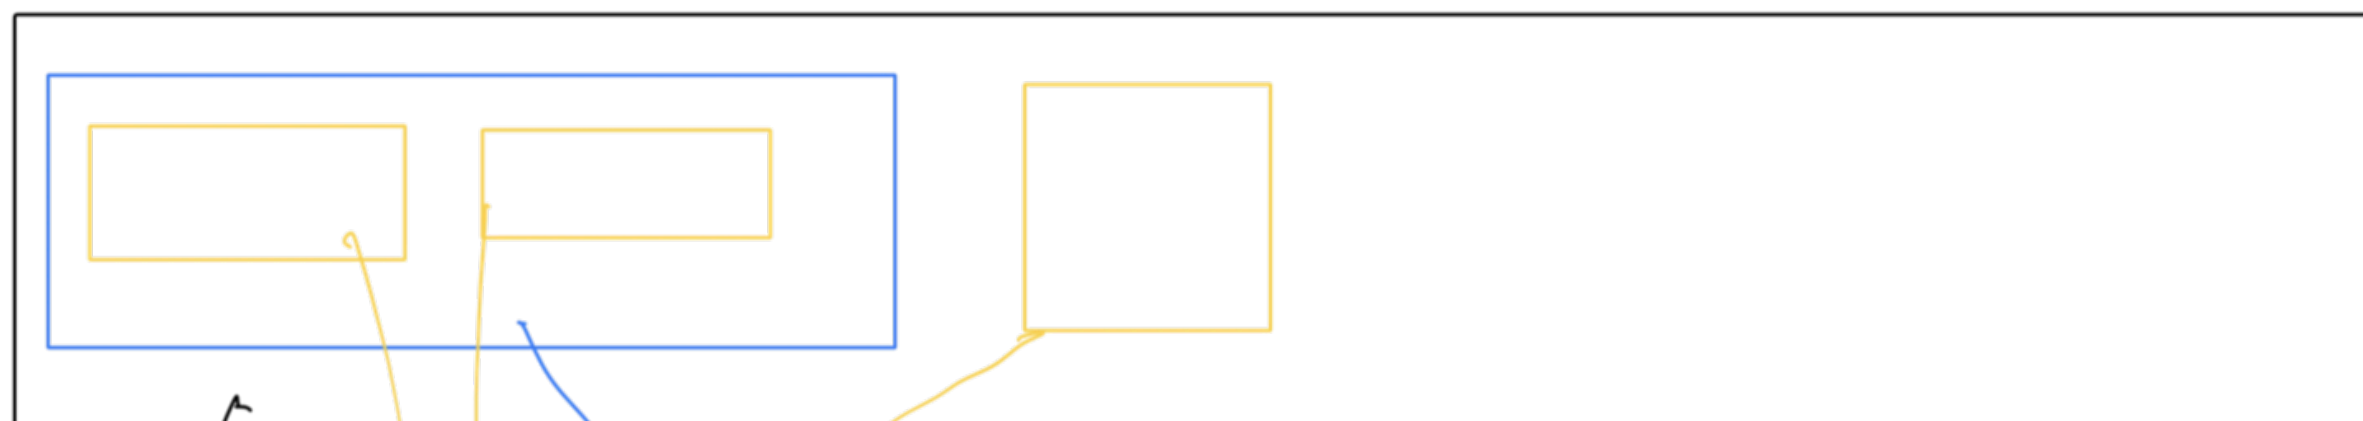

Common Styling, behavior.

Content is passed as a child

```
<Sidebar
  onShow = handler()
  onHide = func()
  content = {jsx}
/>
```

2) Editor Bar

Common Scrollable Bar

Island
Buttons

```
<Editor Bar
```

```
  items = [button, island[button, button], island, ]
```

```
>
```

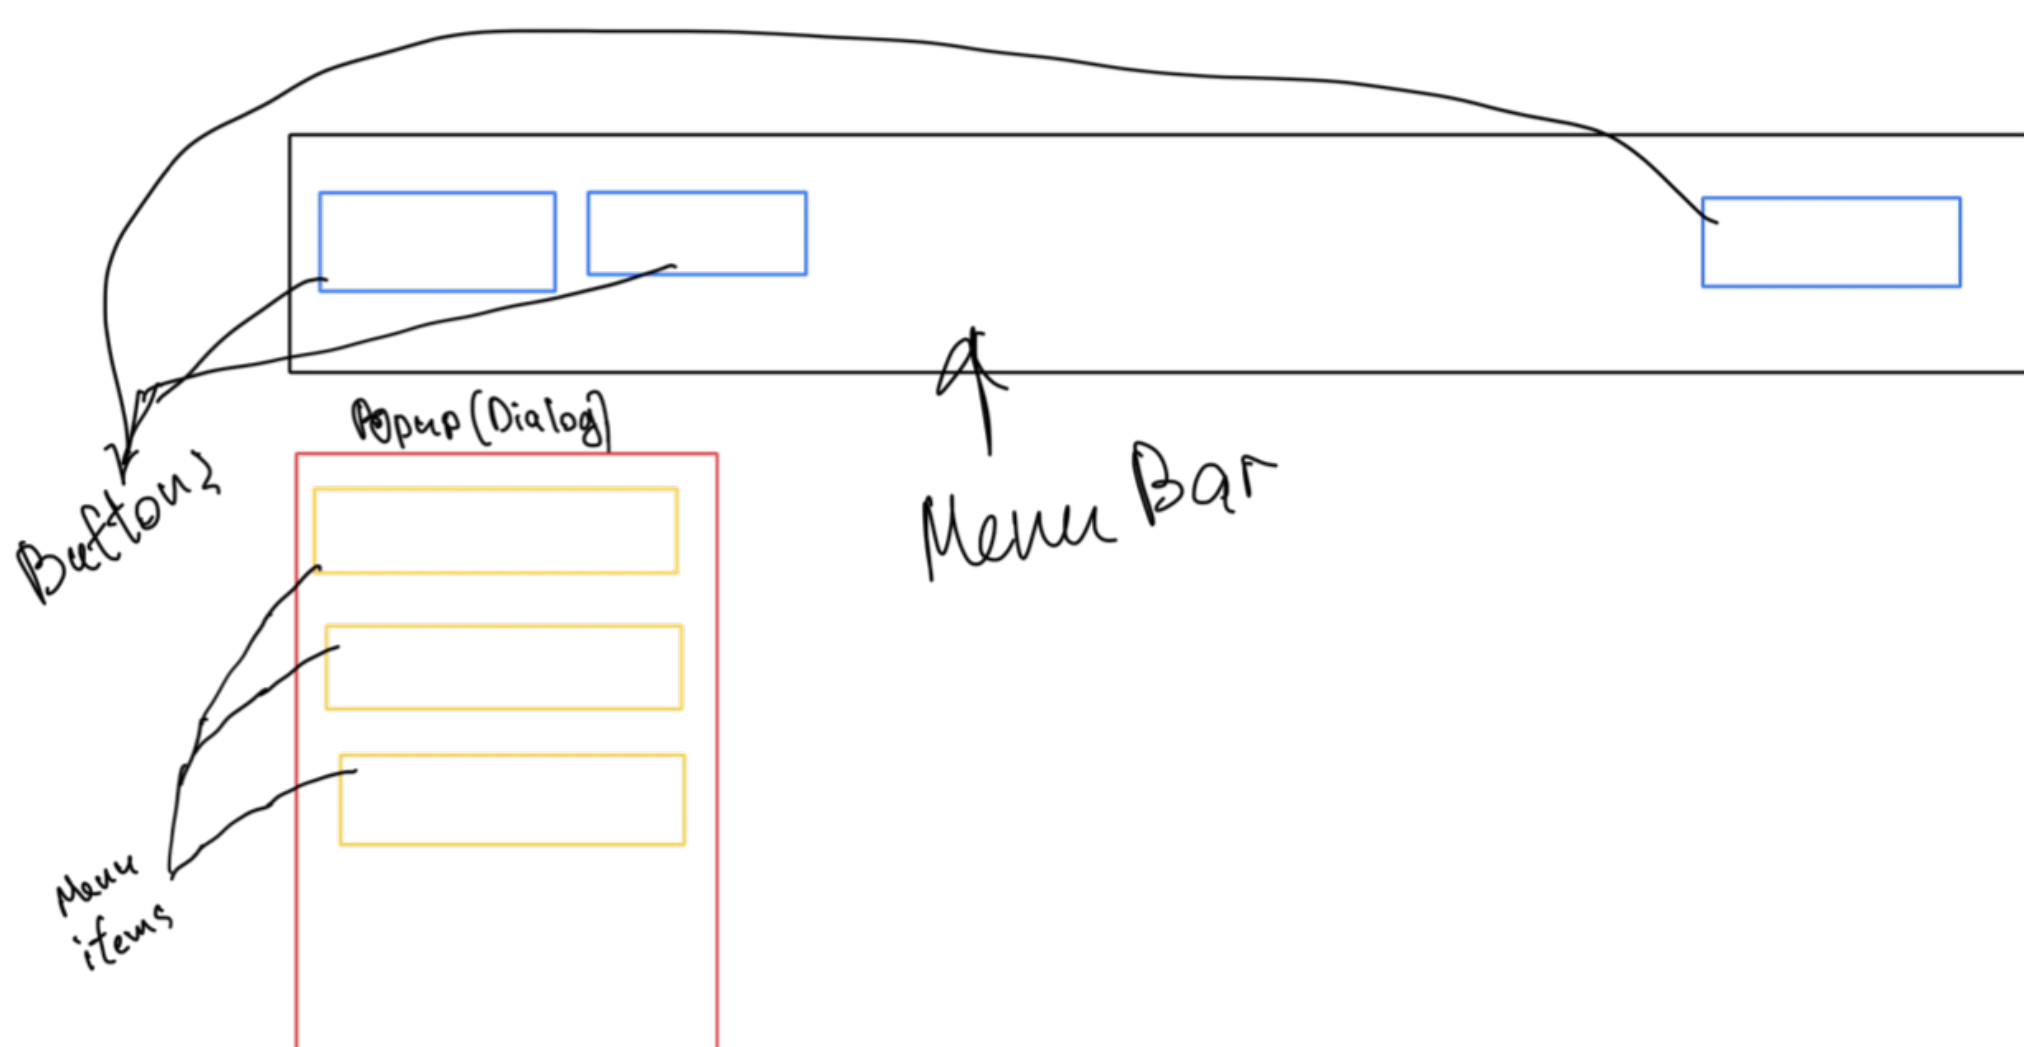

```
<Button
  onClick = ()
  isEnabled = true
```

```
>
```

```
<Island
  items = [Btn1, Btn2]
```

```
>
```

3) Menu Bar

```
<Menu Bar
  leftItems = [Btn1, Btn2]
  rightItems = [Btn3]
```
